

Invited guest speakers, short communications and posters

The scientific programme will include plenary lectures, short oral communications and poster sessions covering the total field of milk science. During plenary lectures, invited speakers will provide a broad coverage of important scientific breakthroughs and the rapid new development in the field. Participants are invited for short oral communications and poster presentations.

Programme and sessions

Starts on the 25th March at 15:15

○ **Milk components & Structure**

*Dr. Nicola C. Woodward, Institute of Food Research, Norwich Research Park, UK.
Preliminary title: Protein network and interfacial characterization – health aspects.*

○ **Functional properties of milk components**

*Dr. Fanny Guyomarc'h, INRA France.
Preliminary title: Role of protein aggregation/micelles – functional aspects.*

○ **Challenges of milk and dairy processing**

*Dr. Geoffrey Smither, CSIRO, Australia.
Preliminary title: Milk bioactives – Microencapsulations.*

○ **Health aspects of milk and dairy products**

*Dr. Christian Mølgaard, Department of Human Nutrition, University of Copenhagen.
Health aspects of milk and dairy products in the diet.*

Ends on the 27th March at 11:00.

Topics to be covered by researchers, PhD and Msc students

- *milk proteins; genetic variants beta casein A1-A2 milks*
- *milk fat and fatty acids*
- *minerals in milk*
- *digestion, transport and absorption of components*
- *gut health - cell and immune response, microbiota*
- *diabetes, obesity and cardiovascular diseases.*
