Prishtina, 1 October 2012

Honoured and respected:

Prof. dr. Sissel Rogne ;

Prof. Dr. Mensur Vegara and Prof. Dr. Thor S. Larsen,

Some obstacles Facts and reasons !

- We received two presentations in „PPT“, from:
University of Belgrade – Faculty of Agriculture and
So-called. "University of Prishtina" located in Mitrovica.**

After analysis and thinking about these presentation, we see in such circumstances, there is less and less spaces for cooperation in scientific level, because it is more and more political issues, that do not allow cooperation in this the project !.

Letter, sent to Prof. Dr. Mensur Vegara, Prishtina, 10 September 2012

I will try to enumerate key reasons - which are precise:

1. In the presentation from colleagues Faculty of Agriculture of University of Belgrade, is the entire map, without any reservation or quotes, the entire territory of Republic of Kosovo, is included in this map! (See PPT-1. !).
2. This fact is not acceptable, because the reality is that R. Kosovo is an independent state, with all the attributes which belong to one normal state.
3. In presentation from colleagues in "K. Mitrovica", written that "the University in Pristina" was founded on the basis of the Serbian Government 2001, whatever, which unacceptable fact!
4. Official and constitutional name, the Republic of Kosovo, but not "Kosovo and Metohija" (see PPT-2. !).

- 5. Therefore, in these presentations have more political issues, and less professional or scientific issues, the least acceptable and approved participation and cooperation on these and such projects.**

- 6. While, till do not change these circumstances, I consider that the conditions and the spaces, for me personally and for colleagues who were part of the team, despite the fact that the Confirmation, was signed by Dean of Faculty of Agriculture and Veterinary Prof. Dr. Skender Muji.**

7. In the end I hope to be clear, we are available for cooperation on equal right and legal basis, about scientific and professional issues, it is our obligation for the better future of all countries and nations.

8. Finally for FAV, under these circumstances and conditions, unfortunately the project has been completed !
