Noragric Report No. 5
February 2002

Noragric
Agricultural University of Norway
The Centre for International Environment and Development Studies, Noragric, is the international gateway for the Agricultural University of Norway’s (NLH) twelve departments, associated research institutions and the Norwegian College of Veterinary Medicine in Oslo. Established in 1986, Noragric’s contribution to international development lies in the interface between research, education (MSc and PhD programmes) and assignments.

Noragric Reports present findings from various studies and assignments, including programme appraisals and evaluations.

This Noragric Report was commissioned by the Norwegian Agency for Development Cooperation (NORAD) to Noragric. It is based on a study conducted in collaboration with the Relief Society of Tigray (REST) and Mekelle University College, Ethiopia in 1996.

Extracts from this publication may only be reproduced after prior consultation with the employer of the assignment (NORAD) and with the consultant team leader (Noragric). The findings, interpretations and conclusions expressed in this publication are entirely those of the author(s) and cannot be attributed directly to the Centre for International Environment and Development Studies (Noragric/NLH).
