

Travel support for travel from Oslo **FOR 2009-10**

The prices below are collected from various Norwegian travel websites.

No special attention has been made to collect fares from travel agencies since this is intended for student use. The objective was to find the most inexpensive airfare without taking sales or time restrictions into consideration. All airfares listed have at least three sources and are cross-checked against various dates in a pre-defined period.

The cities in the parenthesis indicate which destination has been checked; as a general rule, it is the capital of the country, but not in every case.

The initial trip to Norway from outside of Europe and the final passage home the airfare is calculated at the rate for a one-way ticket + 50%. For round trip tickets, the airfare is calculated at the rate for a one-way ticket multiplied by 2. The travel support is given as 30% loan and 70% stipend.
